

**Amendments to the Specification:**

Please replace the paragraph beginning at page 6, line 20 of the specification with the following amended paragraph:

--In operation, a user loads each of his CDs/DVDs in the apparatus 105 via the CD/DVD drive 110 ~~405~~ tray. The apparatus 105 includes logic which, in one embodiment, automatically copies all of the CD/DVD audio/video data to the mass storage device 130 in compressed/encoded format. Alternatively, one embodiment allows the user to select only certain tracks from the CD/DVD to be copied to the mass storage device 130. When the user subsequently decides to listen to an audio CD, the audio content is readily available on the mass storage device 130. --
